GUIDE

Free backlinks for your website: step by step with Gemini and Claude

This is the guide we promised in our Instagram video. Gemini finds the directories that fit your niche, and Claude fills in the profile forms in your browser. The work takes about 5 minutes, and the result shows up weeks later.

01
Gemini finds the platforms
You enter your niche and your city. Gemini returns a table of spam-free directories and map platforms.

02
Claude fills in the profiles
You paste the table into Claude. Claude controls the browser and fills in each platform's form with your details.

03
The result shows in weeks
Google does not count new links right away. Check your position in search again after a few weeks.

01 · Gemini

Find the platforms with Gemini

Send the prompt below to Gemini. Replace the two bracketed items with your own business: the niche and the city. The answer comes as a table of exact registration links that Claude's browser tool can read.

`gemini.google.com`

Prompt 1: for Gemini

```
You are an elite SEO strategist. I need a verified list of high-DR, spam-free platforms allowing free
business profiles with a live website backlink (citations, directories, map listings).

Business Niche: [Your Niche – e.g., Italian Restaurant]
Target Location: [e.g., Baku, Azerbaijan or Global]

Strict Output Rules for Browser Automation:
1. Provide ONLY platforms that have an open, free registration/claim form.
2. No link farms, no high-spam PBNs. Only legitimate authorities.
3. For each platform, provide the exact registration/add-business URL (not just the homepage).
4. Format the output as a clean table and Markdown block so Claude Browser Agent can parse it immediately:
[Platform Name] | [Direct Sign-up / Listing URL] | [Category] | [Required Fields]

Provide 10-15 direct actionable links.
```

The prompt itself is in English. You can write the niche and the city in any language.

02 · Claude

Fill in the profiles with Claude

Paste the table Gemini gave you into the list section of the prompt and send it to Claude. In the business details, enter your company name, website, a short description, phone, email and address.

`claude.ai`

Prompt 2: for Claude

```
You are an assistant agent that performs browser automation. Using your browser control tool (browser /
computer use), register a profile for my business, one by one, on each site in the list below.

My business details:
• Company name: [Full name of your company]
• Website URL: [https://yoursite.com]
• Description (bio): [1–2 sentences of unique business copy]
• Phone: [+994 XX XXX XX XX] | Email: [business@mail.com]
• Address: [City, street, building]

Platform list from Gemini:
[Paste the table or list Gemini gave you here, exactly as it is]

Automation instructions:
1. Open each direct registration URL in the list in the browser.
2. Find the "Add Business" or "Register" button or the form fields, and enter my company details in them.
3. If a CAPTCHA or an email OTP code is required, stop and ask me for the code, then save the profile once
it is confirmed.
4. Add the finished link of each successful profile to a final report table.
```

> **Careful.** Claude fills in forms, but it does not create accounts or enter passwords. You complete the sign-up, the email code and the CAPTCHA steps yourself.

Checklist

Stage	What to check
Finding the platforms	At least 10 directories with a high domain rating (DR/DA) should be confirmed. Relevance matters more than the count: register only on real directories that fit your business.
Consistent NAP details	Name, address and phone (NAP) must be written identically on every site.
Link correctness	The website address must start with HTTPS.

If you are short on time

Let SaytPro do the SEO

Directory profiles are only one part of SEO. Site speed, structure, content and keywords affect the result too.

If you are short on time, our team can take care of all of it.
